<u>IN THE SPECIFICATION</u>

The title has been amended to read as follows:

--PRINTING APPARATUS AND METHOD FOR NO-MARGIN

PRINTING--.

Please replace the paragraph at page 7, lines 13-21, with the following

amended paragraph.

With this arrangement, print data outputted by the input section 111 is

stored in the input buffer 112. One page of print data from the input buffer is inputted to the

dividing section113. The dividing section [[114]] <u>113</u> then divides the one page of print data

in accordance with the division numbers J and K indicated by the instructing section 114. The

dividing section [[114]] <u>113</u> then outputs the pieces obtained by the division to the printing

section 115 as a plurality of print images.
